EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Cancel claims 109-114 as being directed toward an invention non-elected without traverse.

2. The following is an examiner's statement of reasons for allowance: Prior art fails to teach, disclose, or suggest, the invention as recited in independent claims 3, 36 and 103 wherein a portion of the conformal insulating layer is formed in the inter-electrode region or wherein the undercutting is filled in by the conformal insulating layer. Jacobs et al. had been relied upon to teach undercutting as necessarily occurring in the process of Nariani. However, even if the undercutting would necessarily occur, Jacobs et al. then teach etching the upper electrode (polysilicon layer under which the undercut occurs) back so as to remove the portion overhanging the undercutting (see Jacobs et al. figure 4). Thus, when a conformal insulator is formed in the process of Jacobs et al., the conformal insulator will not be in the claimed inter-electrode region or in the undercutting since the undercutting no longer exists and the inter-electrode region is defined by the bounds of the upper electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
